Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12/03/02.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-6 and 8-12 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention for the reasons set forth in the last Office Action.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 and 8-12 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Oeschle et al. (U.S. Pat. No. 5,484,620)(hereinafter Oeschle) for the reason set forth in the last Office Action.

Response to Arguments

Applicant's arguments filed 12/03/02 have been fully considered but they are not persuasive.

Applicants argue that the term "about" is definite because "infringement of the claims can clearly be assessed." The term "about" is a relative term, which renders the claim indefinite. The term "about" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. Therefore, because applicants have provided no evidence that the specification defines the term, the claims are still held to be indefinite.

With regards to the rejection based on obviousness, applicants state that the prior art reference makes no mention of the claimed parameters, i.e., shape factor, uniformity coefficient, specific surface, etc. As stated in the last Office Action, said claimed attributes are considered to be result effective variables that those in the art commonly optimize to obtain the desired filter aid. Applicant teaches as much on page 6, where it is shown that shape factor is a ratio of the smallest diameter to the largest diameter of the particle (as disclosed in Trsferts et Phases Dispersees) and the specific surface is measured by the method taught by Lowell et al. (Powder surface area and porosity). These are well known physical characteristic measurements performed in the art.

Lastly, applicant asserts that Table 2, of the instant specification, provides for unexpected results. Table 2 is narrowly directed to the use of a nylon material (Rislan) and a polyamid 12 (Orgasol). The claims are not so narrowly written as to be directed to only these types of filter aids. Nor do the broad claims exclude some of the filter aids used in the comparison. At present the data found in Table 2 does not embody unexpected results for the claimed invention.

Conclusion

Art Unit: 1761

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
